

PRIYANKAR "SUNNY" CHAKRABORTY

Claude Solutions Architect & AI Product Engineer | Claude Code • Agents • MCP • Claude API

Atlanta, GA | priyankar.chakraborty@gmail.com | github.com/suncal

linkedin.com/in/prriyankarr-chakraborty-773118184 | Portfolio: everbuiltstudio.com/pc-8to47yr3n3

PROFESSIONAL SUMMARY

AI product engineer who builds and ships with Claude every day. In 2026 built 43 apps, sites and tools with Claude Code, 23 of them live, including an oversight layer that grades AI agents against human work, an open-source MCP proxy, a visa-sponsorship data platform indexing 315,736 employers, and a TypeScript outcome runtime backed by 314 tests.

Backed by 10+ years delivering technical solutions for clients in healthcare, health sciences, media and e-commerce, leading distributed engineering teams, and running secure production systems. Brings what Claude deployments need: turning a business problem into a working, tested agent or product fast, then hardening it for real users.

TECHNICAL SKILLS

Claude & agents: Claude Code (daily driver), Claude API (streaming, tool use), Agent Skills authoring and packaging, MCP servers, proxies and connectors, multi-step agent design, agent evaluation and trust ladders, audit trails for AI actions, prompt and context engineering

Languages & frameworks: TypeScript, JavaScript, Python, SQL, Bash; Next.js, Hono, React, Better Auth

Platforms & delivery: Cloudflare Workers, D1 and Pages, Vercel, Render, GitHub Pages and Actions; unit, browser and end-to-end testing; CI-gated deploys; Docker, Terraform; AWS (7+ years)

Domains: Government data pipelines, careers and immigration data, real-estate data, fintech calculators, programmatic SEO, real-time audio, computational chemistry

EXPERIENCE

Founder & AI Product Engineer — Suncal (independent), Atlanta, GA

2026 – Present

- Build every product with Claude Code as the primary engineering tool: 43 apps, sites and tools shipped in 2026, 23 live and 7 on their own domains, with 25 public repositories at github.com/suncal.
- **Tacit:** Self-hosted, MIT-licensed oversight layer that grades a company's AI agents against what its own people do, promotes agents through a shadow, propose, then act trust ladder, and keeps a verified-work ledger with EU AI Act Article 12 and 14 evidence.
- **mcp Slim:** Open-source MCP proxy that compresses tool outputs to cut Claude Code token usage, measured at 90% on real list responses.
- **OMNIRA:** Intent-to-outcome runtime (plan, rehearse, approve, execute, verify) built as a TypeScript monorepo with Next.js, Hono, Better Auth, a worker and a CLI; 314 unit tests and 4 browser tests with CI passing.
- **AscentWork:** Visa-sponsored job platform joining government sponsor registers from 7 countries (US DOL and USCIS, UK, Canada, Ireland, Netherlands, Denmark, Germany): 315,736 licensed employers matched to about 26,200 live roles from 675 job boards, refreshed hourly. Adds sponsor grading, in-browser CV matching, AI cover-letter drafts and a browser extension.
- **OTC Tax Deed Finder:** Subscriber data product covering 8 tax-deed sources and 8,200 mapped parcels, with FEMA flood-zone and Census road-access checks that surface defects in 24% of parcels checked. Site and API run on one Cloudflare Worker; CI deploys and asserts the payroll.
- **Crucible:** Browser game where every move is a real docking calculation (AutoDock Vina scoring, Monte Carlo pose search) in plain JavaScript against four disease targets, with an AI lab partner served through its own Worker.
- **Lantern:** Elderly check-in subscription on Cloudflare Workers and D1 with Web Push, payment integration, production cron jobs and 64 end-to-end checks.
- **Agent Skills and content systems:** Authored and packaged reusable Claude Agent Skills, including an eight-phase SEO pipeline with a human-approval gate; built programmatic SEO sites such as paysums.com (6,587 pages); delivered client websites through Everbuilt Studio, including US 250 Tour and P CHAK Consulting.

AWS Cloud Architect — Legacy Worldwide, Duluth, GA

03/2019 – Present

- Design and deliver technical solutions for companies in healthcare (Zoe Wellness Centers of America), health sciences (Zoe Logics), media and e-commerce (Picnic Time), translating business requirements into specifications developers build against.
- Hire, onboard and lead offshore developers and DevOps engineers across the U.S., Europe and Asia, holding code quality and timelines; contract role since 10/2024.

- Built CI/CD pipelines (GitHub Actions, Jenkins, GitLab), infrastructure as code, centralized logging and least-privilege access policies; migrated production databases with minimal downtime.

Earlier roles — Picnic Time Inc. and Legacy Worldwide

01/2016 – 03/2019

- IT & EDI Coordinator (Picnic Time): automated media workflows and built product databases. IT Manager / SEO & Lead Generation (Legacy Worldwide): managed IT staff and systems and ran SEO programs.

CERTIFICATIONS & EDUCATION

AWS Certified Solutions Architect · CompTIA Security+ · Project Management Professional (PMP)

Diploma in Programming — Brain Point Institute, Mumbai

Bachelor of Commerce — Sydenham College of Commerce & Economics, Mumbai

2003
