AWS Certified Solutions Architect · CompTIA Security+ · PMP

PROFESSIONAL SUMMARY

Cloud architect and AI product engineer with 10+ years in IT, including 7+ years designing and running AWS infrastructure for healthcare, health-sciences, media and e-commerce companies. In 2026 built 43 apps, sites and tools with Claude Code, 23 of them live, including a visa-sponsorship data platform indexing 315,736 employers, an oversight layer that grades AI agents against human work, and a TypeScript runtime backed by 314 tests.

Brings the combination forward-deployed and applied-AI teams hire for: enterprise cloud and security depth, delivery leadership across distributed teams, and the ability to take an idea to a tested, deployed product in days.

TECHNICAL SKILLS

AI & agents: Claude Code, Claude API (streaming, tool use), agent design and evaluation, MCP servers and connectors, Agent Skills, prompt and system-prompt design, audit trails for AI actions

Languages & frameworks: TypeScript, JavaScript, Python, Java, C++, Bash, SQL; Next.js, Hono, React, Flask, Better Auth

Cloud & platforms: AWS (EC2, VPC, S3, Lambda, IAM, RDS, Aurora, DynamoDB, CloudFormation, CloudWatch, Route 53, SQS, SNS, DMS, Organizations), Cloudflare Workers, D1 and Pages, Vercel, Render, GitHub Pages

DevOps & quality: Docker, Kubernetes, Terraform, Jenkins, Ansible, GitHub Actions, GitLab CI/CD; unit, browser and end-to-end testing; CI-gated deploys

Data & domains: Government data pipelines, geospatial checks (FEMA, Census), programmatic SEO, payments integration, Web Push, real-time audio, computational chemistry

EXPERIENCE

Founder & AI Product Engineer — Suncal (independent), Atlanta, GA 2026 – Present

- Built and shipped 43 apps, sites and tools with Claude Code; 23 are live, 7 on their own domains, deployed on Cloudflare Workers, D1 and Pages, Vercel and GitHub Pages. 25 public repositories at github.com/suncal.
- AscentWork:** Visa-sponsored job platform joining government sponsor registers from 7 countries (US DOL and USCIS, UK, Canada, Ireland, Netherlands, Denmark, Germany): 315,736 licensed employers matched to about 26,200 live roles from 675 job boards, refreshed hourly. Adds sponsor grading, in-browser CV matching, AI cover-letter drafts and a browser extension.
- Tacit:** Self-hosted, MIT-licensed oversight layer that grades a company's AI agents against what its own people do, promotes agents through a shadow, propose, then act trust ladder, and keeps a verified-work ledger with EU AI Act Article 12 and 14 evidence.
- OMNIRA:** Intent-to-outcome runtime (plan, rehearse, approve, execute, verify) built as a TypeScript monorepo with Next.js, Hono, Better Auth, a worker and a CLI; 314 unit tests and 4 browser tests with CI passing.
- OTC Tax Deed Finder:** Subscriber data product covering 8 tax-deed sources and 8,200 mapped parcels, with FEMA flood-zone and Census road-access checks that surface defects in 24% of parcels checked. Site and API run on one Cloudflare Worker; CI deploys and asserts the paywall.
- Crucible:** Browser game where every move is a real docking calculation (AutoDock Vina scoring, Monte Carlo pose search) in plain JavaScript against four disease targets, with an AI lab partner served through its own Worker.
- Lantern:** Elderly check-in subscription on Cloudflare Workers and D1 with Web Push, payment integration, production cron jobs and 64 end-to-end checks.
- Developer tooling and content systems:** Released mcpslim, an open-source proxy that reduces MCP token use; packaged reusable Agent Skills; built programmatic SEO sites including paysums.com (6,587 pages on 2026 tax tables); delivered client websites through Everbuilt Studio.

AWS Cloud Architect (Contract) — Legacy Worldwide, Duluth, GA 10/2024 – Present

- Design and implement AWS solutions for Legacy Worldwide's companies in healthcare (Zoe Wellness Centers of America), health sciences (Zoe Logics) and media (Davis Media Production).
- Translate business requirements into technical specifications; hire, onboard and manage offshore developers and DevOps engineers across the U.S., Europe and Asia while holding code quality and timelines.
- Advise in-house teams on cloud best practices, automation and cost optimization.

AWS Cloud Architect — Legacy Worldwide, Duluth, GA 03/2021 – 10/2024

- Wrote an AWS Lambda function that ingests AWS CodeBuild logs into LogDNA for centralized monitoring, and authored YAML CloudFormation templates for VPC, EC2, RDS and security groups.

- Built CI/CD pipelines in GitHub Actions, Jenkins and GitLab CI/CD; migrated on-premises SQL Server databases to Amazon RDS with AWS DMS with minimal downtime.
- Wrote IAM and S3 bucket policies, including cross-account access, under least-privilege rules; designed fault-tolerant multi-tier architectures for clients including Picnic Time.

AWS Cloud Architect & Engineer — Legacy Worldwide, Duluth, GA *03/2019 – 03/2021*

- Containerized Python applications with Docker; deployed on EC2, S3, RDS, SQS and Route 53 with CloudWatch cost and performance alarms; built VPC networking; mentored engineers on AWS practices.

IT & EDI Coordinator — Picnic Time Inc., Moorpark, CA *01/2018 – 03/2019*

- Automated media-processing workflows, built product databases and an internal knowledge base, and ran data-analysis projects for Marketing and Product Development.

IT Manager / SEO & Digital Lead Generation Specialist — Legacy Worldwide, Duluth, GA *01/2016 – 01/2018*

- Recruited and managed IT staff, administered SCCM deployments, and supported SEO and lead-generation programs.

CERTIFICATIONS & EDUCATION

AWS Certified Solutions Architect · CompTIA Security+ · Project Management Professional (PMP)

Diploma in Programming — Brain Point Institute, Mumbai

Bachelor of Commerce — Sydenham College of Commerce & Economics, Mumbai *2003*
